

SUMIDA CORPORATION

Presentation of the 4th Quarter FY2007

~ Summary of 2007/1B7 & Future Business Plan ~

19th February, 2008

Shigeyuki Yawata, CEO
Saburo Matsuda, CFO

Summary of 1st to 4th Quarter FY07 (Consolidated)

■ Improvement of Net Sales and Operating Income Ratio

Reasons:

- ✓ Delay in the sale of Inverter Unit Business
- ✓ Delay in the restructuring of Mexico factory

Main action items in FY07

- Review of unprofitable business
 - Sale of Jensen (Sweden)
 - Production shift from Mexico to China
 - Restructuring of VOGT
 - Sale of Inverter Unit Business (Taiwan/China)
- Streamlining the balance sheet
 - Sale of non-core assets in Taiwan
 - Sale of headquarter building

Net Sales

Grew steadily with strong legacy business and expansion of Automotive and VOGT business.

-> UP 10.6% year-on-year

Operating Income

Increased by smooth expansion of existing business and improvement of profitability through structural reforms.

-> UP 13.0% year-on-year

Ordinary Income

Decreased due to smaller exchange gain occurred by strong yen.

-> DOWN 3.0% year-on-year

(However, UP 21% if excluding the exchange rate factor)

Net Income

Improved significantly by profit from sales of unprofitable business and fixed assets.

-> UP 30.9% year-on-year

Comments

- Sales grew steadily, and operating income ratio in the 4th Quarter has reached 8% level
- Various measures of structural reform have been completed

1. Exchange Profit/Loss

	07.1Q	07.2Q	07.3Q	07.4Q	2008	Average in past 12 months
Yen/USD	118.1	123.3	115.6	112.4	108	117.65

■ Improvement of Net Sales & Operating Income Ratio

Low operation availability rate due to Christmas

Sales of unprofitable subsidiaries

Main action items in 2007

- Streamlining of unprofitable departments of VOGT
(Including restructuring of 2 companies)
- Production shift from East Europe to China
 - Improve productivities

- Most restructuring measures have been completed within 2 years after the takeover of VOGT
- Aiming further improvement in profitability by focus on business expansion, and synergy effect with SECL

Summary of Mid-Term Business Plan"1B7" (FY03-07)

■ Improvement of Net Sales, Operating Income Ratio and EBITDA Ratio

1B7 target

- Net Sales: 100 billion yen
- EBITDA Ratio: over 10%

Results

- Achievement of quantitative target
 - Achieved EBITDA ratio target / net sales target under achievement due to the sale of businesses
- Establishment of strategic business field
 - 2 foci: general consumer electronics business and automotive business
- Mindset change of staff as a 100 billion yen enterprise
 - Self-consciousness as a member of a leading global enterprise
 - Secure excellent human resource through improving skill of staff

Actions for a New Growing Stage

O. I. R.

Net Sales

Operating Income

FY01~FY04
Despite difficulties to increase sales due to the burst of IT bubble economy, production shift to China helped to increase in profit ratio.

FY04~FY07
Scale increased through active M&A activities. Although profit ratio is dropped, profit growth increased.

FY07~FY10
Targeting 20% increase in yearly profit growth rate

Measures to Sustain the Outcome of 1B7 and for Further Development

■ Strategic and financial results of 1B7: Profit growth by scale expansion

- Scale expansion through active M&A - aiming to pursue economies of scale and improve presence in the electronics component market
- Establishing two main strategic businesses (general consumer electronics, automotive) through expansion of business fields and trade areas
- Operating income ratio during FY04~FY06 dropped as a result of active scale expansion

■ Significance of FY2007 strategy: Foundation for the restoration profit rate

- Promotion of consolidating expanded organizations, production sites and streamlining unprofitable departments
- Sale of headquarter building and downsizing assets
- Further improvement of productivities in manufacturing
- Strengthening executive management by recruiting 2 COOs
- Actual achievement of rebound of operation income ratio if taking the sale of the inverter unit business as a prerequisite
- Establishment of the structure that can enjoy the advantages of scale expansion

Measures to Sustain the Outcome of 1B7 and for Future Development

- **Preparation for the new growing stage: To achieve 20% increase in yearly growth profit rate by improving profit ratio and scale expansion**
 - Create foundation of global management to maximize operation synergy and focus on 2 strategic businesses: general consumer electronics & automotive
 - To carefully promote integration with VOGT from a long-term perspective by considering cultural gap with Europe
 - To establish global production system by using China as the core – pursue the best production global network (plan to reduce intermediate stocks and running cost by improving efficiency in supply chain)
 - Japan & Europe (being the center of automotive electric component development) to focus on basic research and module components development
 - To expand VOGT's know-how on development of module components of globally (To establish an efficient structure which allows smooth operation)
 - To centralize development teams on product application to China (launch and utilization of Central-Lab)
 - Establishment of New Business Creation Company (NBCC) – aim at developing new business and coordination to achieve synergy
 - To create and develop new businesses
 - To list up and review potential M&A targets
 - To promote synergy effect among various organizations
 - To coordinate the interest among various organizations, and handle global management issues
 - Further improvement in efficiency of managing assets
 - To set up global financial management system (to pursue a more efficient capital management)
 - to maintain our global cash balance at a reasonable level
 - To reduce stock by reviewing batch production in VOGT

From FY2008 onward, we aim to further create our corporate value through business development with profitability – “An enterprise with profit of 100 billion yen”

Future Perspective – Good Business Environment which enables further Development

Condition: Growth rate of Coil market

- **Coil market is expected to maintain 10% value-based growth rate globally hereafter**
 - Increase demand for coil's noise removal function through digitalization of electric appliances
 - Increase demand for coil's technology which supports energy saving (power control / sensor function etc.)
 - Increase demand for coil's antenna function through improving communication feature
 - Increase the number of in-car coils through development of automotive electronics

Sources of Sumida Group to create its corporate value

- **Wire-wound coil to enjoy similar growth as the market**
 - Compartmentalization by product characteristics: Chip coil and piezoelectric ceramic
 - From our positioning in wire-wound coil market, it is very possible to achieve 10% growth in Asia and 5% growth in Europe
- **Concentrate the productization of coil in China (Utilize C-Lab)**
 - Improve development speed by information aggregation
- **Seeking new production sites for coil**
 - Idea of Sumida "Silk Road": making China/Panyu as core, to develop new production sites in Western part of South Asia (Guangxi, Vietnam, India)
-> aim further cost down
 - Shift coil production of VOGT to China to improve the profitability
 - Improve the efficiency of supply chain -> Improve cash flow/ customer service
- **Promoting synergy between SVG & SECL**
 - Promote VOGT's ability on module developing acquired through engaging European automotive industry to the whole Sumida Group

Seek to create new business by setting 2 main businesses
