

SUMIDA CORPORATION

- Consolidated Results of the 2nd Quarter FY 2008 -

7th August, 2008

Shigeyuki Yawata, CEO
Saburo Matsuda, CFO

Summary of the 2. Quarter 2008

Net Sales vs. plan lower by about 800 M yen (5%)

Operating Income vs. plan lower by about 200 M yen

Reasons:

1. Impact of sales decrease 200 M yen

2. Cost increases

① Personnel costs 270 M yen

② Material costs 80 M yen

} 350 Mio JPY

3. Effects of Profitability

Improvements -350 M yen

200 M yen

Impact of increased personnel and material costs have been offset by profitability improvements

*Factors which led to profitability improvements

① VOGT : Restructuring measures in the previous half year

② SECL : Selling of the Inverter unit

Consolidated Financial Statement:

Summary of the 2nd Quarter and 1st Half Year of FY2008

Reasons for the Deviations from Plan	Short-term countermeasures	Long-term countermeasures
<p>Sales General stagnation of the market, especially in the USA</p> <p>Operating Income 1. Impact of declining sales 2. Personnel costs ① Increase of minimum wages ② Increased amount of overtime 3. Material costs price increase of copper ⇒ higher prices for copper wires</p> <p>Ordinary Income Impact of currency exchange rates Impact of increased RMB vs. HK\$ (differences in the processing fees to commissioned factories in China came up)</p>	<p>Sales Compensate the stagnation of sales for consumer electronics with products directed non-consumer electronics</p> <p>Operating Income</p> <ul style="list-style-type: none"> • Negotiate for price increases • Drop unprofitable products <p style="text-align: center;">⇒ improve profitability</p> <ul style="list-style-type: none"> • <u>Personnel costs:</u> ① ⇒ Start operation of the 1st satellite factory where basic salaries cheaper ② ⇒ reduce <u>20% overtime</u> (July) <ul style="list-style-type: none"> • <u>Material costs:</u> <li style="padding-left: 20px;">⇒ Continue search for additional suppliers to bring down material prices <p>Ordinary Income</p> <ul style="list-style-type: none"> • Negotiate to share RMB/HK\$ risks with factories 	<ul style="list-style-type: none"> • Focus on sales of high-profit/non-consumer electronic related product • Speed up setting up of the 2nd, 3rd satellite factory • Increase productivity/semi-automation <li style="padding-left: 20px;">⇒ bring down overtime hours <p>Increase RMB sales to offset RMB costs</p>

Consolidated Financial Statement:

Summary of the 2nd Quarter and 1st Half Year of FY2008

(Reference) Actual FY 2007	70,210	4,712	4,368	2,855

SECL: Quarterly Sales & EBIT Performance since 1st Quarter 2007

Steady improvement of profitability

- Automotive business and sales for Europe were favorable
- Appreciation of RMB
- Soaring of minimum wage in China
- Increase of overtime due to high turnover ratio

- Improvement of price/cost ratio
- Product price negotiation with customers
- Review of low profit products
- Propose new products

SVG: Quarterly Sales & EBIT Performance since 1st Quarter 2007

Profitability affected by fluctuation of Euro and USD

- Weaker consumer electronics sales were partially compensated by stable performance in automotive and industry markets.
- Impact of foreign exchange rates were higher compared to last year, especially for sales in North America.

- Measures to improve price/cost ratio have been initiated e.g. ramping up production in Eastern Europe and China

Exchange Rate: 1Euro = 163.34 yen

Achievements and Challenges in the first half of FY2008

1. **Sales performance for the automotive sector was strong, in particular in Europe**

Increased number of vehicles installed and equipped with our products

2. **Weak sales for consumer electronics**
General fall in the electronic parts market

3. **Increased Material costs**

Due to the worldwide increase of raw material costs, keep margins through ensuring alternative suppliers and sales price increases

4. **Increased Labor costs**

Continuous increase of minimum wages:
Panyu District:
690 Yuan -> 770 Yuan (April)
-> 800 Yuan (May)

Approach and Prospects from 3rd quarter and onward

1. **Firm sales in the automotive sector also in the 2nd half of FY2008**

In view of declining demand in the short term, marketing of new products to leading manufacturers is planned. Sales channels of existing products are being extended; target also Chinese manufacturers

2. **Greater efforts in Marketing**

Even though market conditions will be difficult also in the 2. half of FY2008, focus on Marketing targeting the Entertainment sector and Industrial devices

3. **Reduce impact by ensuring alternative suppliers**

By extending the production base in China, potential suppliers within China can be increased

4. **Mitigate impact of labor cost increases**

Control labor time (proper overtime), improve productivity continuously, promote semi-automation, continue implementation of the Silk Road Structure

Achievements and Challenges in the first half of FY2008

5. Steady improvement of the European operations

Although sales decreased by (5.1%) vs. previous year, profitability improved as an effect of restructuring measures carried out last year.

Operating Income Ratios:

2nd Quarter: 6.8%

1st Half Year: 6.9%

6. Shift production of unprofitable products to China

Unprofitable products have been transferred to China, where lower production costs allow profit targets to be achieved.

Approach and Prospects from 3rd quarter and onward

5. Further improvement of the effectiveness of European operations

Focus on the improvement of the production structure by increasing profitability of VOGT EMS and Stelco

6. Continue to shift production to China

Continue to transfer production of products where a shift is feasible

• Profit decreased (about 200M yen in the 2Q) due to low sales volume, whereas impact of increased personnel and material costs have been offset by profitability improvements.

• Although the forecast of 2nd half year is cautious (sales forecast is about the same of 1st half) considering variable factors of world economy, in the mid-long term, we plan to further expand and strengthen our high profitable business basis through accelerate integration with VOGT and execute our current business plan, Triple Ex.

New mid-term Business Plan Triple Ex

- Progress of the 5 main themes

Main Themes	Target	Activities carried out in the 1 st Half-Year
		Planned activities for the 2 nd Half-Year
"Sumida Production Silk Road" Concept	<ul style="list-style-type: none"> Strengthen/extend low-cost mass production scheme in Asia 	<ul style="list-style-type: none"> First satellite factory in Nanning (Guangxi) set-up Start operation of the Nanning factory => reduce production costs Advanced feasibility studies on further potential areas to set-up 2nd, 3rd satellite factory
<u>Utilization of Capabilities to respond to customer's needs</u>	<ul style="list-style-type: none"> Provide the 2 following capabilities of SUMIDA globally to respond to customers' needs: <ul style="list-style-type: none"> Capability to respond to customers' demands on performance, lead times and prices Capability to develop products in order to quickly implement new applications 	<ul style="list-style-type: none"> Fully leverage the capability of the operation of the new R&D center in China (C-Lab) Speed up transfer of Know-How of Japanese engineers to C-Lab
<u>Invest in pioneering technologies and in stimulating environment to motivate innovative research of our engineers</u>	<ul style="list-style-type: none"> Market & customer oriented R&D activities in Germany and Japan / the new R&D Center in China (C-Lab) will coordinate and facilitate the collaboration among engineers within the entire Group so as to develop existing new products 	<ul style="list-style-type: none"> Prioritize the identified promising technologies / products Speed up development through additional investment (3 billion JPY in R&D projects)

New mid-term Business Plan Triple Ex

- Progress of the 5 main themes

Main Themes	Contents	Activities carried out in the 1 st Half-Year
		Planned activities for the 2 nd Half-Year
<u>Implementation of global systems in R&D, production and sales aspects</u>	<p>◎Seek opportunities to horizontally and vertically integrate our operations (R&D, procurement, manufacturing, marketing, sales) through M&A activities in order to further enhance and expand our current business operations.</p>	<p>◎Shift production (passive products of coil) from VOGT in Germany to China (VCM) ->enabled significant cost reduction</p> <p>◎Select of M&A projects</p> <p>◎Further accelerate production shift from VOGT to China (VCM)</p> <p>◎Further investigation of M&A projects and start</p>
<u>Develop and strengthen the Global Management System</u>	<p>◎Further improve and strengthen our Global Management System and strive to make the most of our synergies that derive from the diverse cultures and experiences of Sumida Group.</p> <p>Take action more efficiently and more swiftly as we achieve unification and synergy across the diverse corporate cultures of the companies.</p>	<p>◎Formulate individual HR plans by Sumida Academy</p> <p>◎Enter into domination agreement with VOGT ->enables closer integration within the Group and increases scope for synergy</p>

1st Half: Global unification in Sumida Group improved steadily
2nd Half: Utilize satellite factories and promote innovative R&D

Progress of "Sumida Silk Road"

Progress of "Sumida Silk Road"

Outside of the Factory

Key Data of Nanning Factory

Name :
Sumida Electric (Guangxi) Co., Ltd.

Capital : 20 mil. HKD

Address :
China-ASEAN Advanced
Business Park in Nanning City
(Other Japanese electronics enterprises are
also in the area)

Operation starts: End of August

No. of workers: 1,500 (max)

**Minimum wage
in Nanning ... 580 RMB
(800 RMB in Panyu)**

**Favorable treatments for
foreign enterprise (tax etc.)**

**Lower
manufacturing cost**

For positive growth through proactive technology investment

Expected growth in coil market and Sumida

Sumida's steady growth together with expansion in electric/electronics-related industry

- Long term growth owing to the promotion of digitalization, ubiquitous society, increase demand in sensor, energy saving
- Energy shift from internal-combustion to electric motor due to soaring fuel cost also accelerate Sumida's growth

③ Industry devices, new energy related

Market size: 200 bil. yen
Sumida share: 2.1%, 4.2 bil yen

Energy shift (e.g. oil pressure control -> electric power control)

↓
Most promising segment in a long term

② Automotive

Market size: 500 bil. yen
Sumida share: 4.4%, 22 bil. yen

/Accelerate hybrid, electric power
/Further improvement of automotive electric components

① Consumer

Market size: 500 bil. yen
Sumida share: 7.7%, 38.3 bil. yen

/Further development in digitalization
/Ubiquitous digital society (communication function)

/Sensor function
/Products with smaller form factor
/Noise suppression in high density products

Expected total market size in 2008: 1200 bil. yen
Sumida's share: 5.4%, 64.2 bil. yen

SVG: Possesses high security and high voltage coil technology / Superior experience in industry, energy and automotive business

+

SECL: Superior experience in consumer, automotive device business / agile production and customer correspondence capability in Asia

=

Global company with net sales 100B yen who appreciates increased opportunities for coil business

R&D Contribution for further growth

(Unit: billion yen)

Net Sales

Operating Profit

Promote strategic R&D, pursue synergy effect and M&A in order to achieve "Triple Ex" profitability target

End of the Report
